Current State

State of xPression & Backend Solutions

- Currently running xPression solution version 20.3
 - Released in May 2020
 - Entered Sustaining Maintenance May of 2025 – Additional cost
- Total xPression license investment is ~\$696,939
- Current Maintenance & Support \$296,109 per year
 - Renewal due October 1, 2025
- RFI for upgrading xPression in 2019
 - Latest xPression version requires MS Office 365 – Blocker

Future State

Modernized Customer Communications

OpenText Experience Solution – Leading the way!

Among the strongest scores in platform strength, market presence, company vision and technical strategy

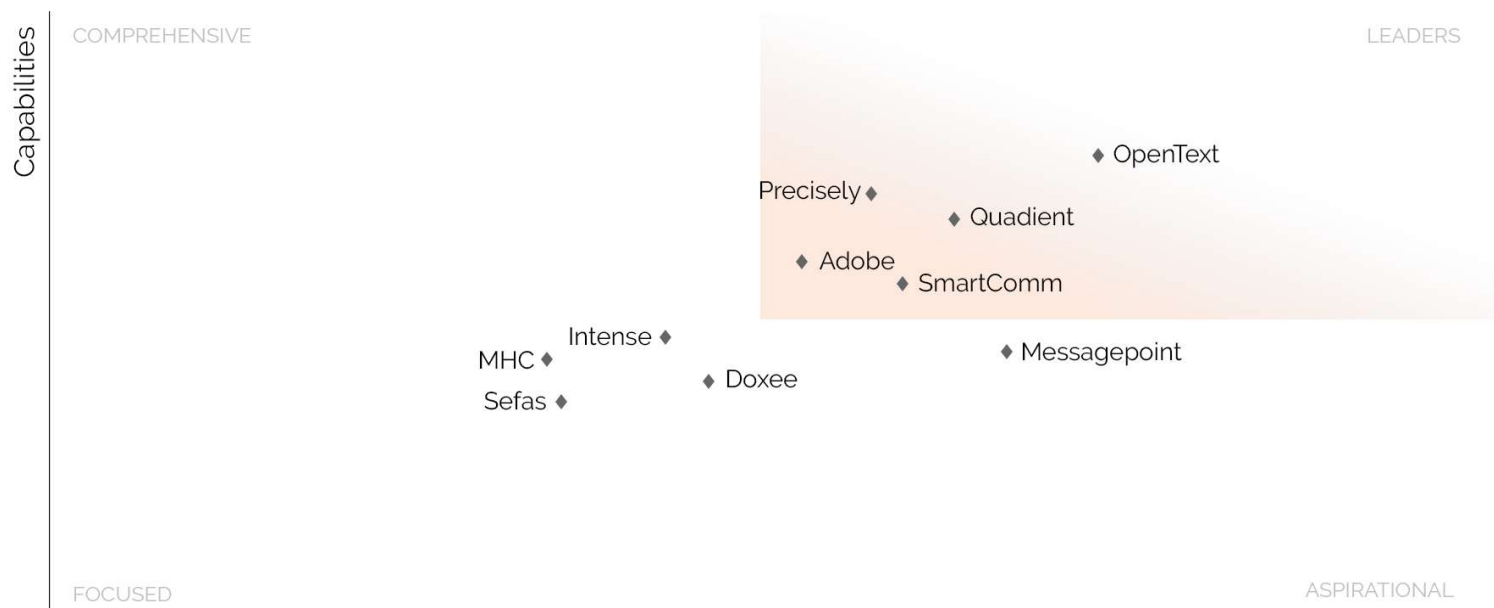

ASPIRE LEADERBOARD®

Software Vendors Only

Communications Experience Platforms (CXP) 2023

Hosted (managed) solutions that combine traditional CCM offerings with capabilities from adjacent fields

The Aspire Leaderboard™ is copyrighted by Aspire Customer Communications Services Ltd. and is based on the findings and opinions of Aspire's consultancy organization. Aspire does not endorse any vendor, product or service included in the Aspire Leaderboard. Published October 2023

Strategic Direction

Partial List of OpenText BCBS Customers

Summary of Communications Product Differentiators

- **Design & orchestration:** Design, author, edit, orchestrate, and monitor using thin-client tools
 - **Impact:** Full cloud-enabled CCM operations for all business personas in one cohesive user experience
- **Agile data processing:** Communications bypasses the need for ETL and data preparation/aggregation with the ability to map data from several sources to be used by designers in a single library during design time
 - **Impact:** Minimize or eliminate expensive data pre-processing steps with custom XML parsers and preparation
- **Migration & rationalization:** Communications includes application migration tools in the product to help move your communications to the cloud faster. Import PDF designs and content, keeping only the content that matters for maximum reuse
 - **Impact:** Rapidly onboard designs and content to get customers operational without dependency on additional services
- **Performance:** Proven high-performance CCM engine in a microservice architecture for on demand, batch, and interactive editing use cases, including highest performance in-memory configuration
 - **Impact:** Deliver exactly the right customer SLA with optimized infrastructure capacity and costs
- **Cloud-Native architecture:** Communications has been designed and engineered from the ground up with simplified Cloud deployments using Kubernetes (vs. containerized legacy application management logic)
 - **Impact:** Automatically, elastically scale and monitor with industry standard operations tooling and skills
- **Extensive multi-cloud platform support:** Broad range of documented support for compute, data, storage, infrastructure platform components in GCP, AWS, Azure, and OpenShift, for flexible “choose your platform”
 - **Impact:** Future-proof your investment with ability to change infrastructure as business conditions evolve

Communications

- **True enterprise-wide Customer Communication Solution**
- **Thousands of Customers producing BILLIONS of transactions annually**
- **True WYSIWYG development environment**
- **Fastest composition engine on the market**
- **Develops and creates all output formats natively**
- **Supports multiple file formats as input**
- **Supports easy design time accessibility tagging for both HTML & PDF output**
- **No code/low code design environment. Requires little technical knowledge**

Smart Communications

- **Point or siloed solution geared towards targeted small business units**
- **Produces much lower volumes**
- **Not a true WYSIWYG; you must preview to see how output may look**
- **Uses an opensource Apache FOP**
- **Relies on transforms and doesn't support HTML design natively**
- **Supports only XML and recently JSON**
- **Requires manually editing parts of the layout/template**
- **Requires technical skills in: XML, XSL, XSL-FO, HTML, and CSS**

Communications

- **True enterprise-wide Customer Communication Solution**
- **Thousands of Customers producing BILLIONS of transactions annually**
- **True WYSIWYG development environment**
- **Fastest composition engine on the market**
- **Develops and creates all output formats natively**
- **Supports multiple file formats as input**
- **Supports easy design time accessibility tagging for both HTML & PDF output**
- **No code/low code design environment. Requires little technical knowledge**

Quadient

- **Print Service Provider solution re-purposed for Enterprise**
- **Not as fast composition as Communications**
- **Limitations to how designs are managed with hidden complexity**
- **Performance issues when not implemented right**
- **HTML5 design is complex and requires tech skills**
- **Integration can be complicated**
- **Limited Accessibility and requires third-party support**
- **Highly technical solution with hidden complexity marketed at non-technical users**

XP to OTC Migration Overview

Functionality our XP Migration Utility Supports:

95+% of XP content is programmatically migrated using our script

- Static / Dynamic Textual Content
- Table Content
- Automap Variable Data from XML Data Source
- Fonts
- Business Rules / Logic
- SubDocuments
- Image Files
- **There is very little which our script doesn't migrate**

XP to OTC Reference Help

Component Mapping from XP to OTC

- xPression Category → Communication Set
- Datasource Group → Datasource
- xDesign Template → Communication
- TextPieces → Sections/contents
 - Supports: Hidden text, Bulleted lists, Tables
 - Unsupported formats become placeholders
 - TOC limited to 6 heading levels
- Rules for Table & Content:
 - Table, read loop → Dynamic tables
 - Criteria → Logics

Data Sources from XP to OTC

- Primary → Driver
- Secondary → References
- Data Source variables → Mapped Communications variables
- Document variables → Unmapped Communications variables

The background of the slide is an abstract digital artwork. It features a gradient of colors from deep blue at the bottom to a lighter, almost white, at the top. The texture is composed of wavy, horizontal lines that create a sense of depth and movement. Overlaid on these waves is a pattern of small, dark blue, rectangular blocks or cubes, arranged in a way that suggests a grid or a series of steps. The overall effect is a modern, digital aesthetic.

Migration Results

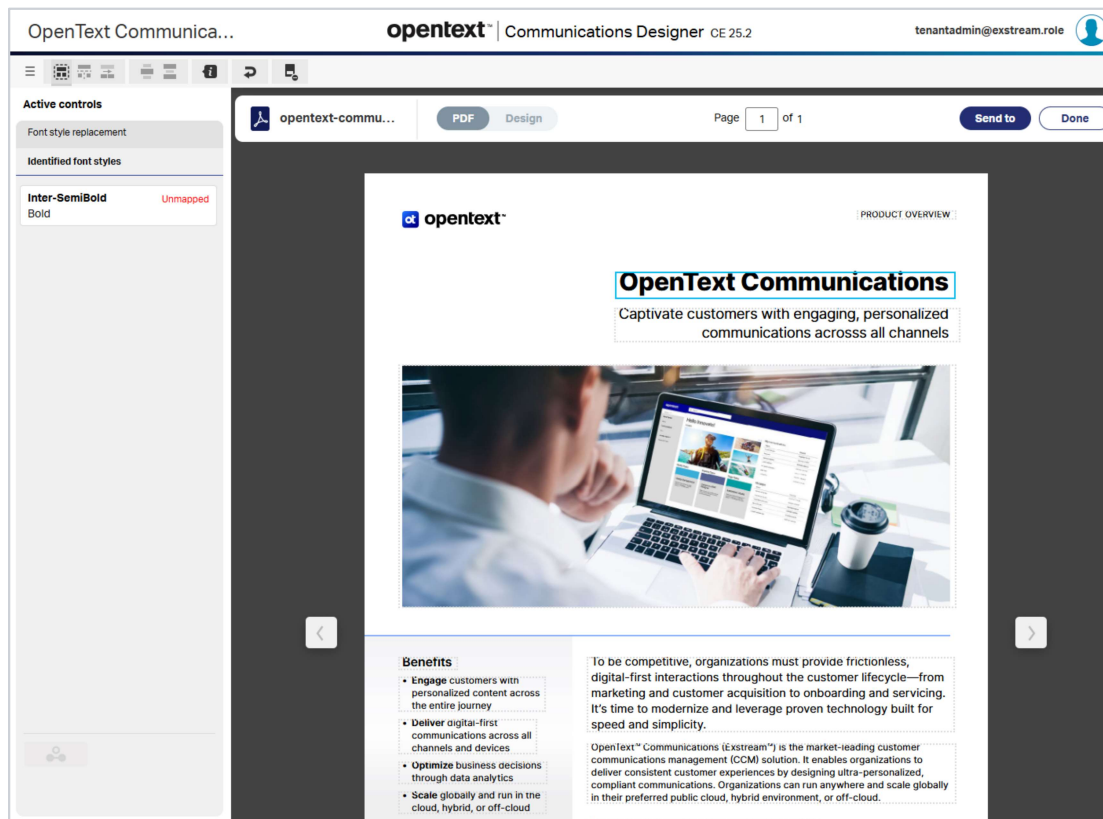

The background is an abstract, low-poly landscape in shades of blue and white. It features a series of rolling hills and valleys, with a bright light source on the left creating a gradient from white to deep blue. The overall effect is a sense of depth and modernity.

Designing with **OpenText Communications**

Customer Experience solutions to
modernize your CCM to CXM

Accelerate the modernization to cloud

Tools to streamline migration to OpenText Communications

Design accelerators for PDF & DOCX import

Native tools for Design Manager application migration

Optimization tools to rationalize existing content

Professional services options from assistance to ownership

Easy creation of multichannel communications

Low-code/no-code dynamic **Communication Designer** to transform customer experiences

The screenshot displays the 'Communication Designer' interface. The main area shows a simulated email layout for 'innovate INSURANCE'. The email header includes a 'To:' field with 'nchriste@opentext.com', a 'From:' field with 'Personalized Auto Insurance quote from Innovate for Na...', and a 'Subject:' field with 'Personalized Auto Insurance quote from Innovate for Na...'. The email body features the 'innovate INSURANCE' logo, a photo of a smiling woman wearing a headset, and a blue banner that reads 'We've got you covered' followed by 'Your personalized auto insurance quote is being processed'. Below this, the email is addressed to 'Nathan,' and includes a congratulatory message about exploring auto coverage options from 'Innovate!'. It also mentions that purchasing auto insurance allows for 'peace of mind' by protecting finances in the event of an accident. At the bottom, there is a call to action: 'Call us today at (No Sample) to see how much you can save.'

The right sidebar contains simulation controls. It includes a 'Simulations' section with a 'Sample file' dropdown set to 'Claim Acknowledgement' and a 'Search...' field. Below this is a 'Data' section with various input fields: 'Effective date', 'Amount Billed' (550.0000), 'Amount You Paid' (0.0000), 'Communication' (Quote), 'Communication Preference' (EMAIL), 'Company_Email' (no-reply@innovate.com), 'CR', 'CreditCardType', 'Customer Address' (810 Bull Lea Run), 'Customer City' (Lexington), 'Customer email address' (nchriste@opentext.com), and buttons for 'Reset' and 'Run'.

Design multichannel layouts in a modern, easy to use UX

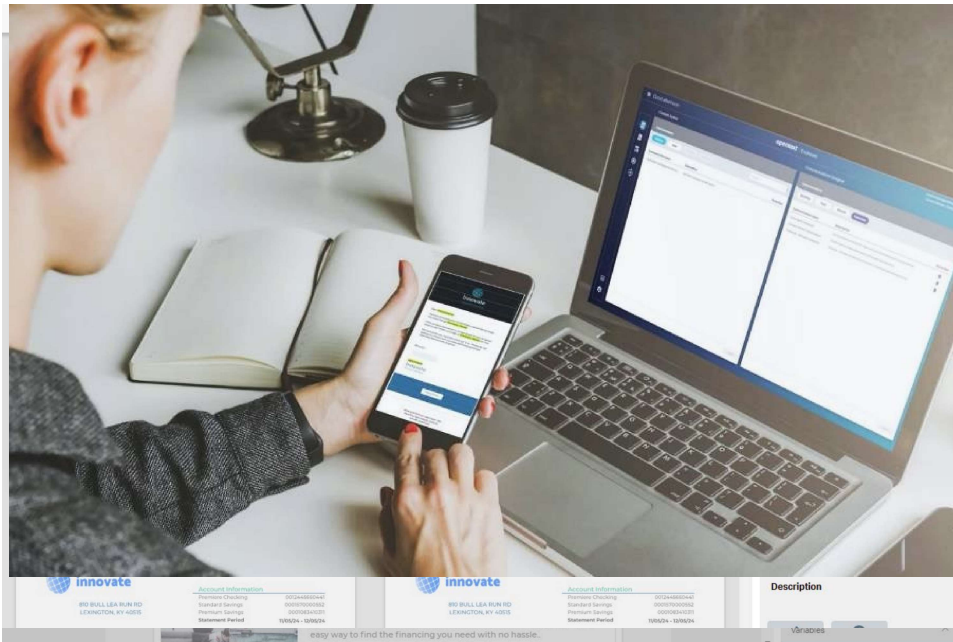

Reuse content on digital channels with no-code email & web design

Built-in multichannel preview with customizable test data

Gain control of customer communications

Create, update, and manage reusable content without help from IT with **Content Author**

Author, add, and manage reusable content in one place

Change once, update everywhere - content reflects for all references

Streamline personalization with targeted content variations

Relevant, targeted, one-to-one communications

Interactive empowers customer facing users to create real-time, personalized communications

The screenshot displays the Exstream for Salesf... interface. At the top, there's a search bar and navigation tabs: 'Exstream for Salesf...', 'Contacts', 'Login to Exstream', 'Exstream Templates', 'Exstream Tracking', 'Log Configurations', and 'More'. Below this, a document title bar reads 'Edit Exstream Document "New Contact Document Jun 26, 2025, 9:31:36 AM"' with buttons for 'Delete', 'Save as Draft', and 'Submit Document'. The main editing area has a blue header with 'BrokerageAdvisorLetter-EMP > Advisor Letter - Empower' and a user profile 'tenantadmin'. A menu bar includes 'File', 'Edit', 'View', 'Text', 'Review', and 'Navigation'. The document content features the 'innovate' logo, a 'Select Advisor' section with 'Your Innovate Financial Advisor May Ling Chiang' and her contact details, and a 'Select Product Information' button. The main body of the letter is addressed to 'ROSE GONZALEZ' and includes a date 'June 26, 2025'. The letter text mentions a meeting and offers to take actions, with a dropdown menu showing 'quarterly', 'semi-annual', and 'yearly' options. The letter concludes with 'Sincerely,' and a signature line.

Integrate controlled editing for customer facing roles into existing applications

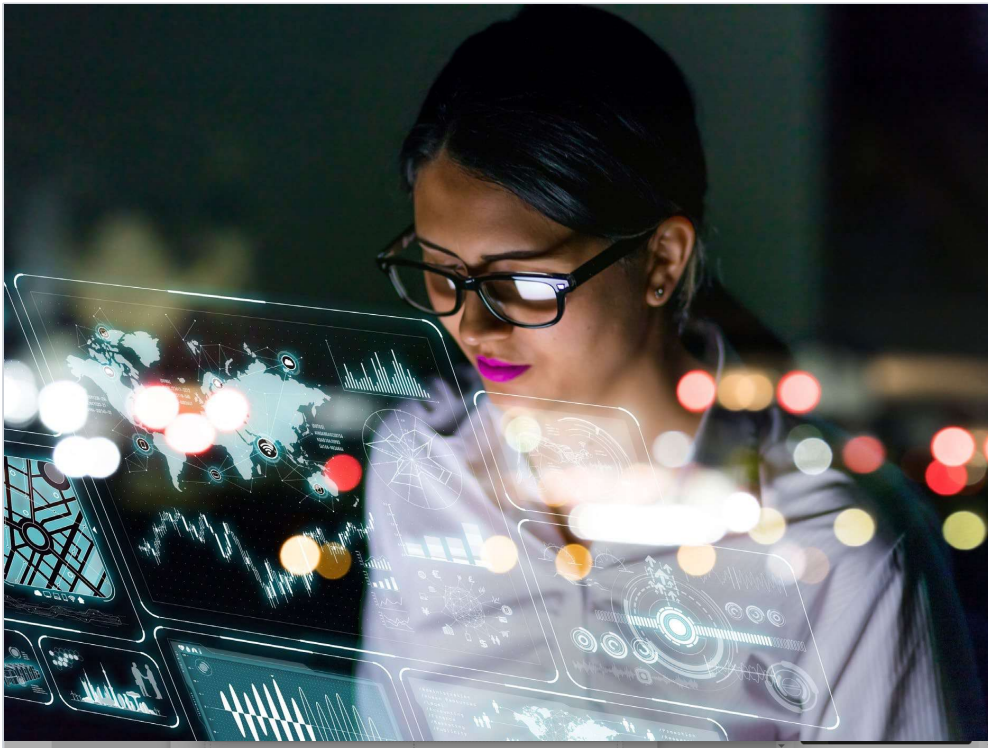

Multichannel editing, preview, & delivery

Review & approval workflows with revision tracking

Accelerate content creation with the power of AI

Create, optimize, and translate content with **Experience Aviator**

Create new content & logic with private & secure generative AI

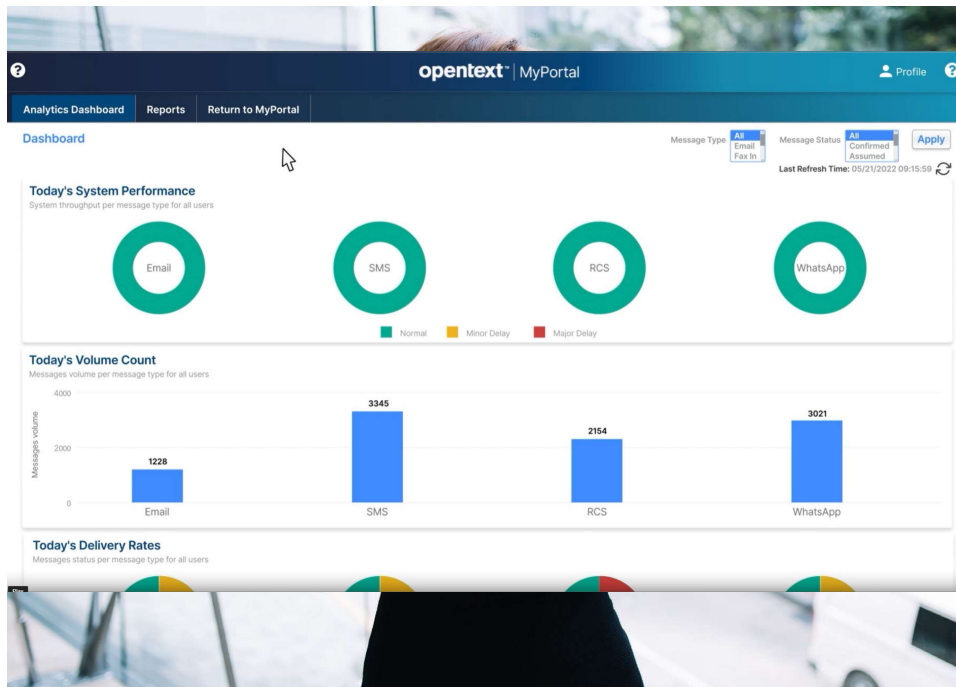

Analyze and improve existing content with Assisted Authoring

Automatically translate content to deliver in preferred languages

Start conversations on your customers' channel of choice

Guarantee mission-critical messages are delivered with **Core Messaging**

Bring all messaging channels together in a single platform

Notification analytics to better monitor the flow of messages

Integrated with OpenText Communications for assured message delivery

Use customer insights to boost customer engagement

Core Journey transforms experiences with automated, data-driven journey management

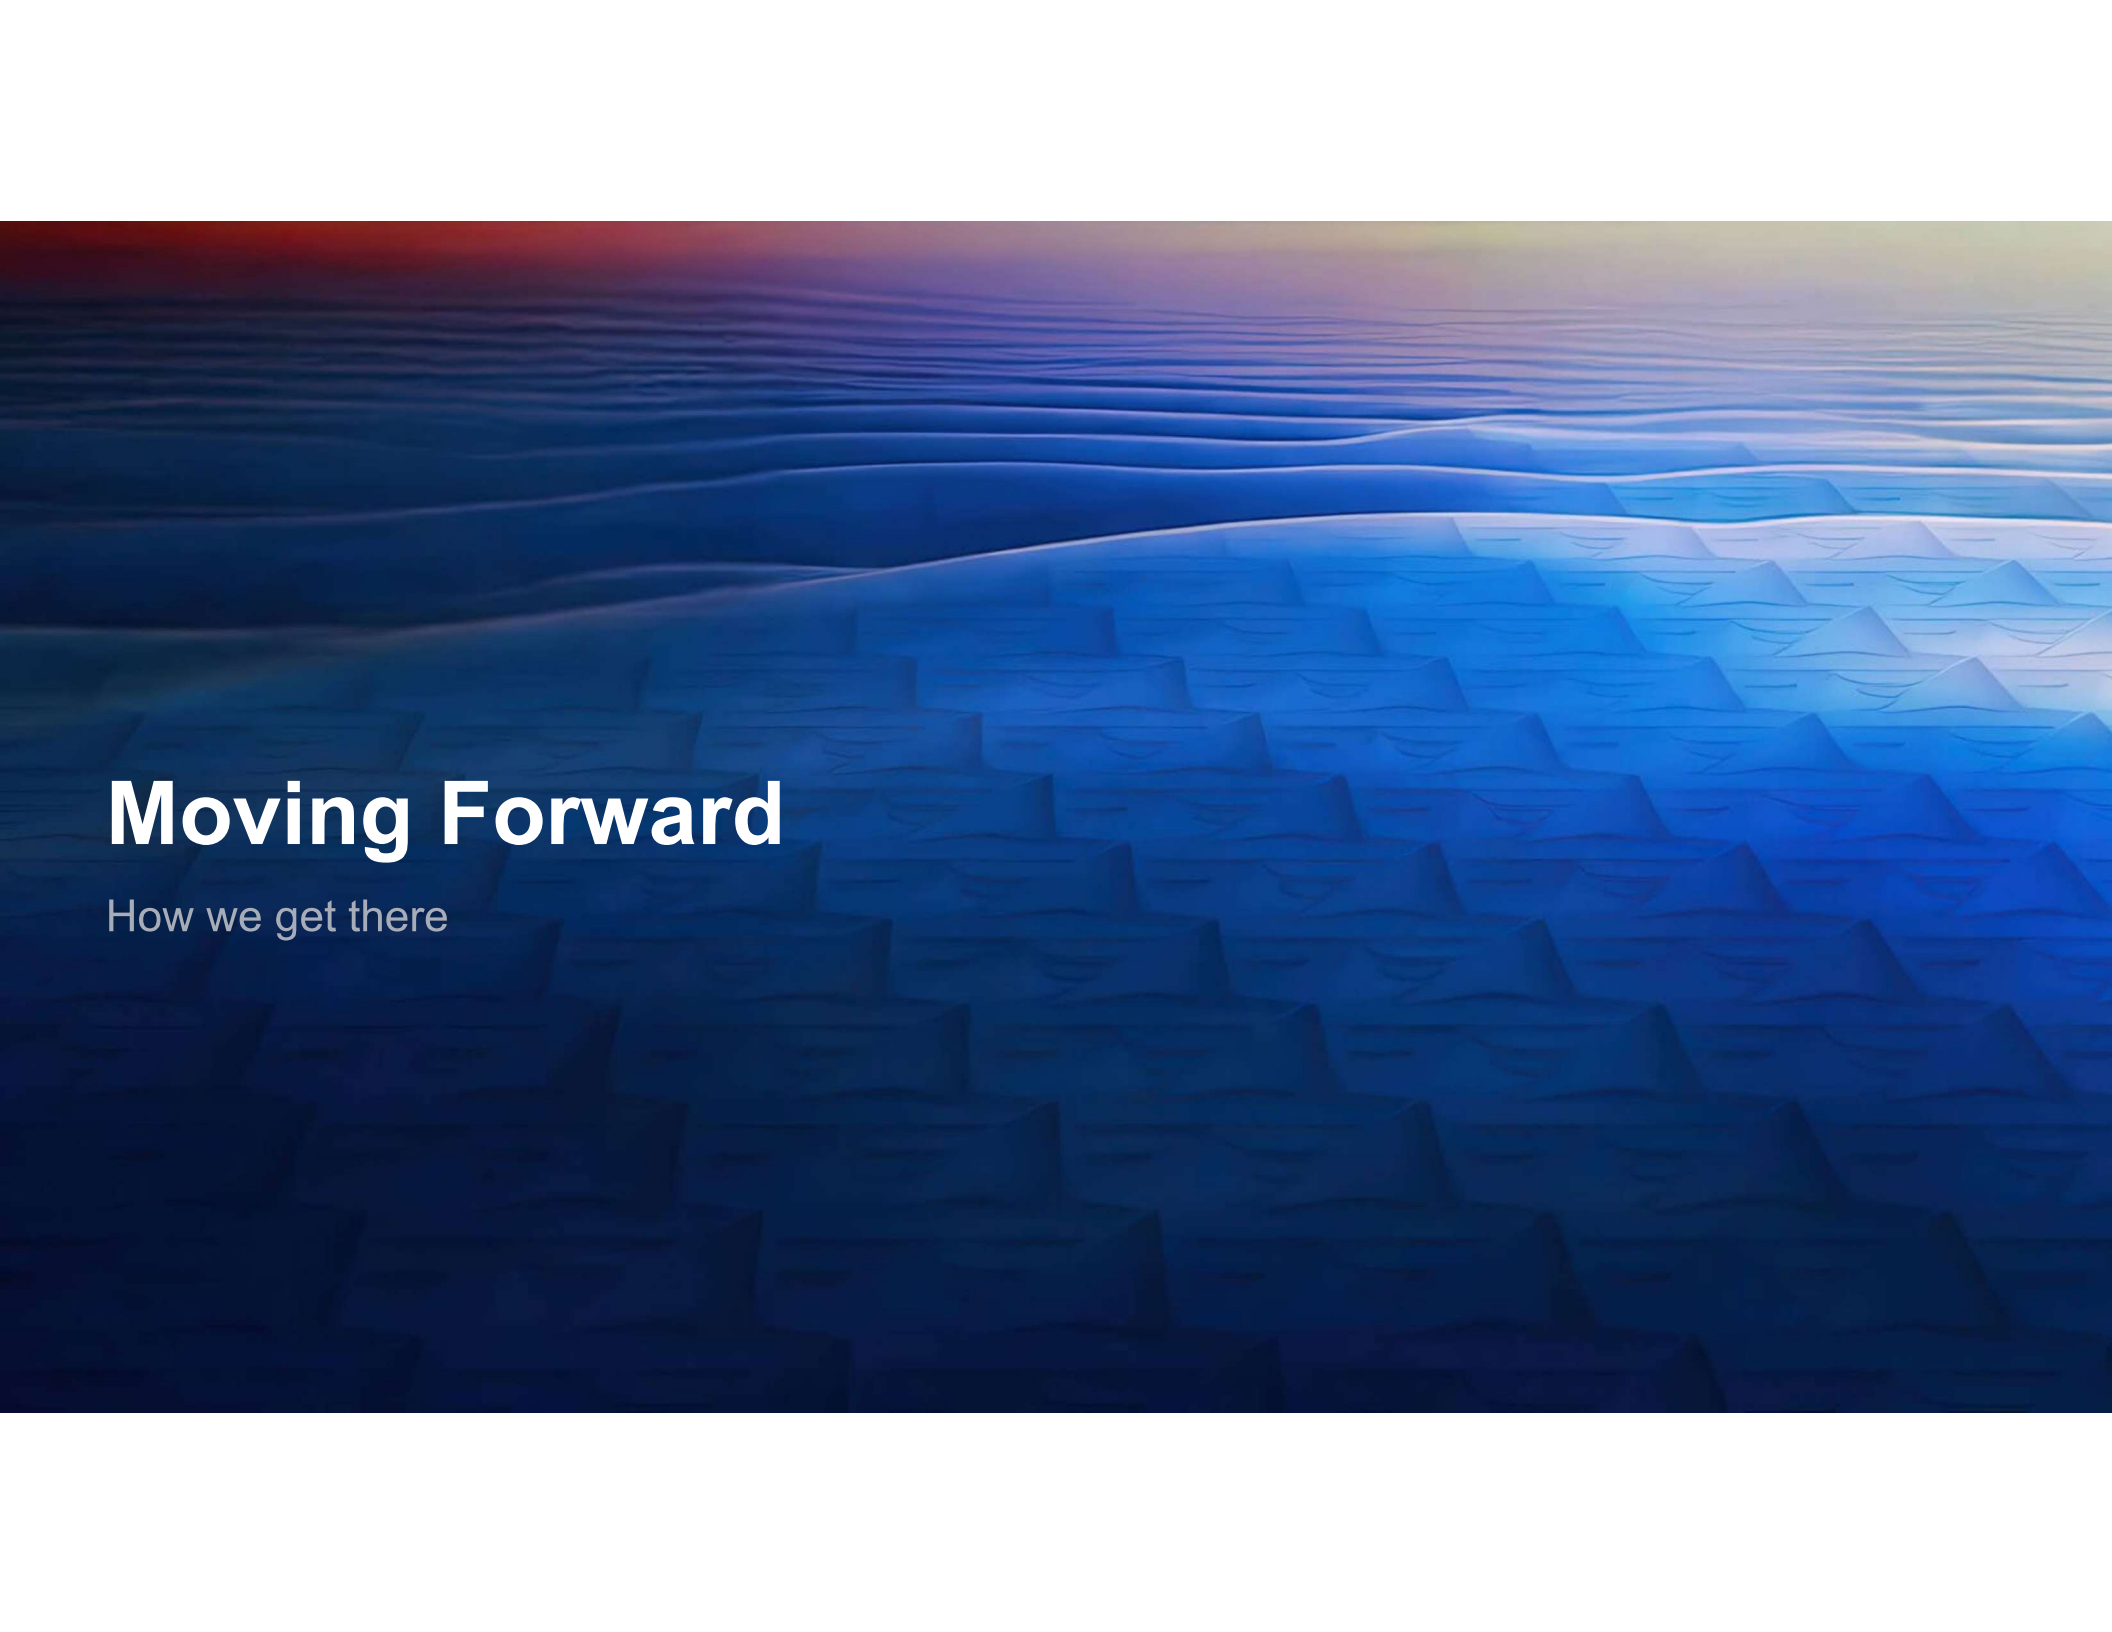

Automate journeys to orchestrate next actions that offer greater relevance and reward

Centralize and analyze data from marketing content, applications, channels, & devices in a single view

Easy-to-use, cloud-based, SaaS technology to stay up to date and maximize ROI

An abstract digital illustration of a landscape. The foreground is composed of a dense field of blue, three-dimensional rectangular blocks or steps that recede into the distance. The blocks are arranged in a way that creates a sense of depth and perspective. The color of the blocks transitions from a deep navy blue in the foreground to a lighter, almost white blue as they approach the horizon. At the top of the image, a horizontal band of light features a soft rainbow gradient, with colors ranging from red on the left to yellow and white on the right. The overall composition is clean and modern, with a focus on geometric shapes and a cool color palette.

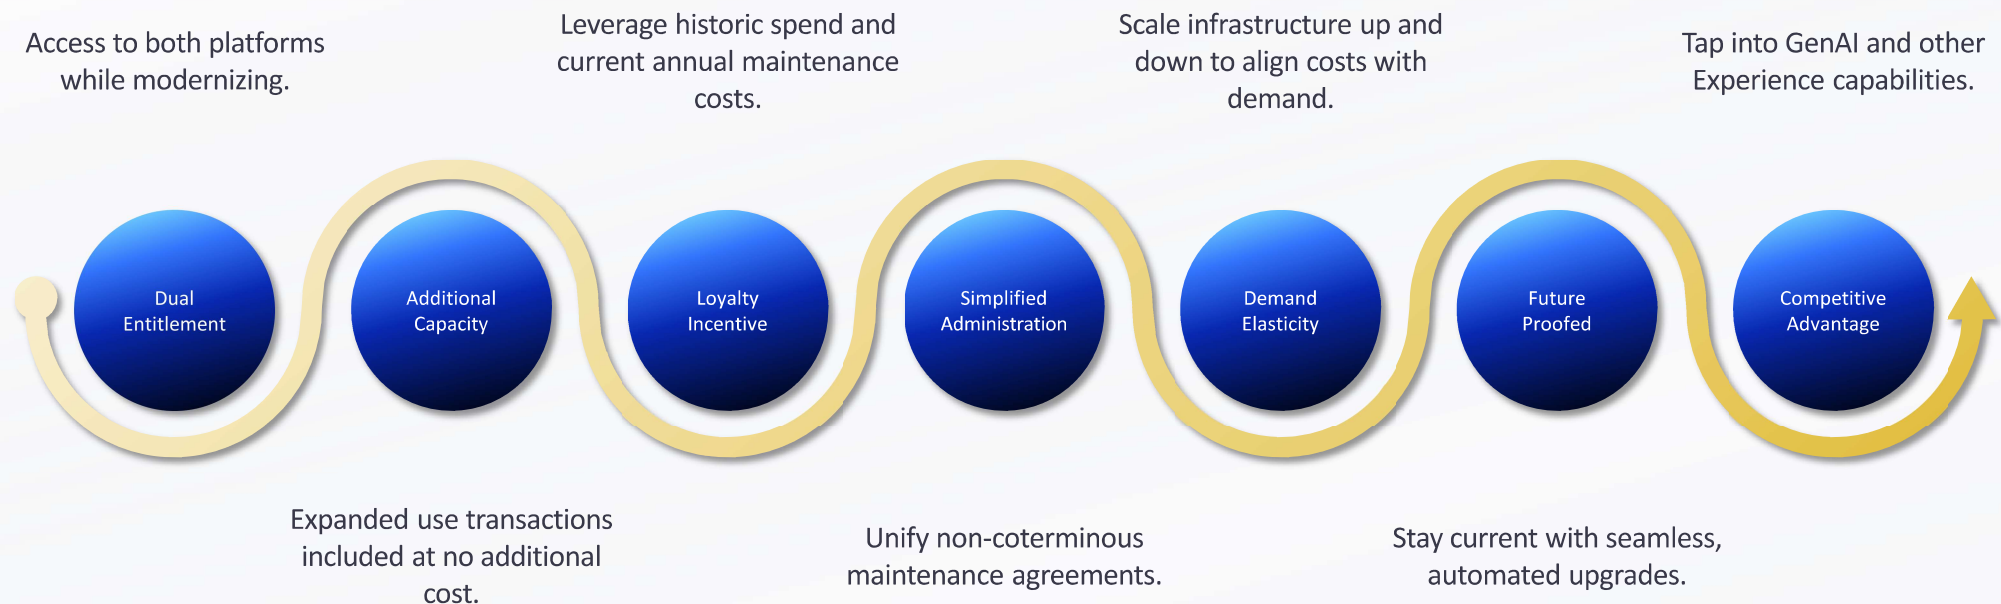

Moving Forward

How we get there

OpenPass for communications modernization.

Built to deliver **value**, fast.

Benefits of “Limited Time” OpenPass Offering

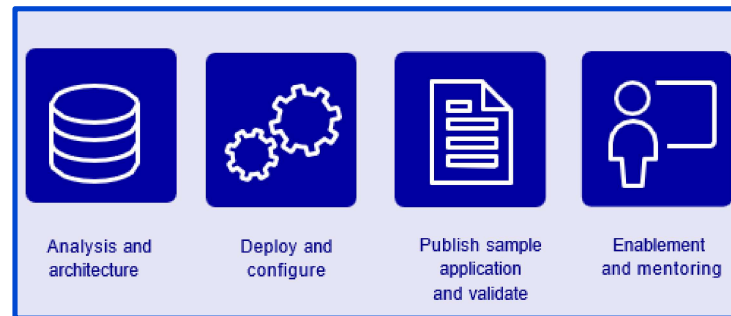

- OpenPass support model flattens the maintenance curve and completely resets your annual renewal.
- Current xPression maintenance renewal is rolled into the single new OpenPass renewal.
- The upgrade to Exstream CN includes designers, interactive, and authoring users as well as all Exstream functionality.
- Grants the rights to simultaneous use of both platforms for duration of migration term.
- Provides a path to the future following your cloud strategy to modernize legacy solutions, lowering overall costs.
- Ability to migrate content from current OpenText version over to Exstream CN building out a Center of Excellence (COE).
- Deploy on-premises and “lift-and-shift” to cloud when ready.

OT Professional Services

Teamwork makes the dream work

FasTrak to Success with OT Professional Services

- **Initial Analysis & Architectural Design**
- **Migration Strategy Session**
 - Develop a Migration Strategy Roadmap for full migration
- **Installation and Configuration**
 - Exstream Cloud Native (CN)
 - Install OT Exstream Design Tools (including Testing)
 - Setup domain assignment workflow to enable promotion of documents from DEV to PROD
 - Install and configure Content Author to enable business user authoring of content
 - Install and configure the Empower tool to enable post-generation editing of individual documents.
 - Configure OpenText Directory Services (OTDS) to enable access and authorization
- **Development & Application Configuration**
 - Deploy Sample Application
 - Provide Empower REST API integration sample code
- **Documentation and Mentoring**
 - Mentoring Support: Included is a dedicated block of hours for mentorship with partner and/or customer. Based on customer direction the hours can be used to cover key areas such as:
 - Setup and management of Exstream Cloud Native configurations.
 - Design and development of document templates using Communications Designer.
 - Design and development with the Empower and Content Author
 - Migrating your current Applications to Exstream CN
 - Workflow integration with Orchestrator.
 - Implementation of Single Sign-On via OpenText Directory Services (OTDS)

 *Price Range of Starter Package \$180,000-\$200,000

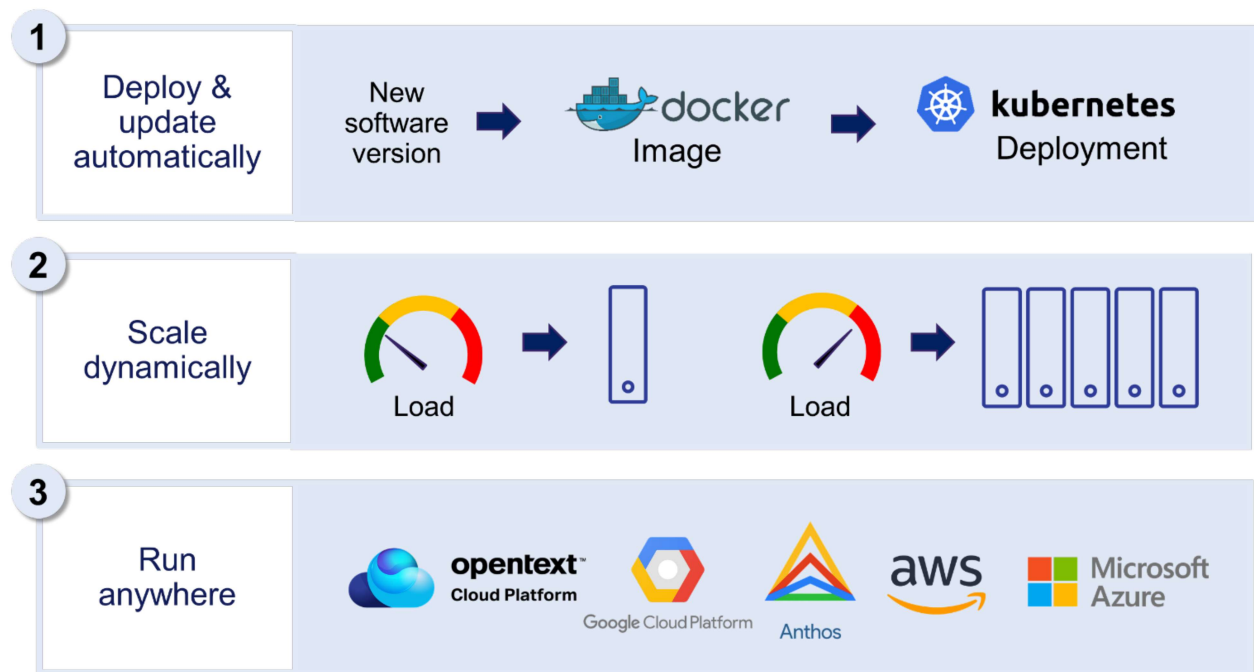

The background of the slide is an abstract digital illustration. It features a horizon line where a sun is setting or rising, creating a gradient of colors from orange and red on the left to yellow and green on the right. Below the horizon, the landscape is composed of numerous blue, three-dimensional pyramids or cubes arranged in a dense, repeating pattern that recedes into the distance. The overall color palette is dominated by blues, with the warm tones of the sunset providing a contrast.

Communications Architecture

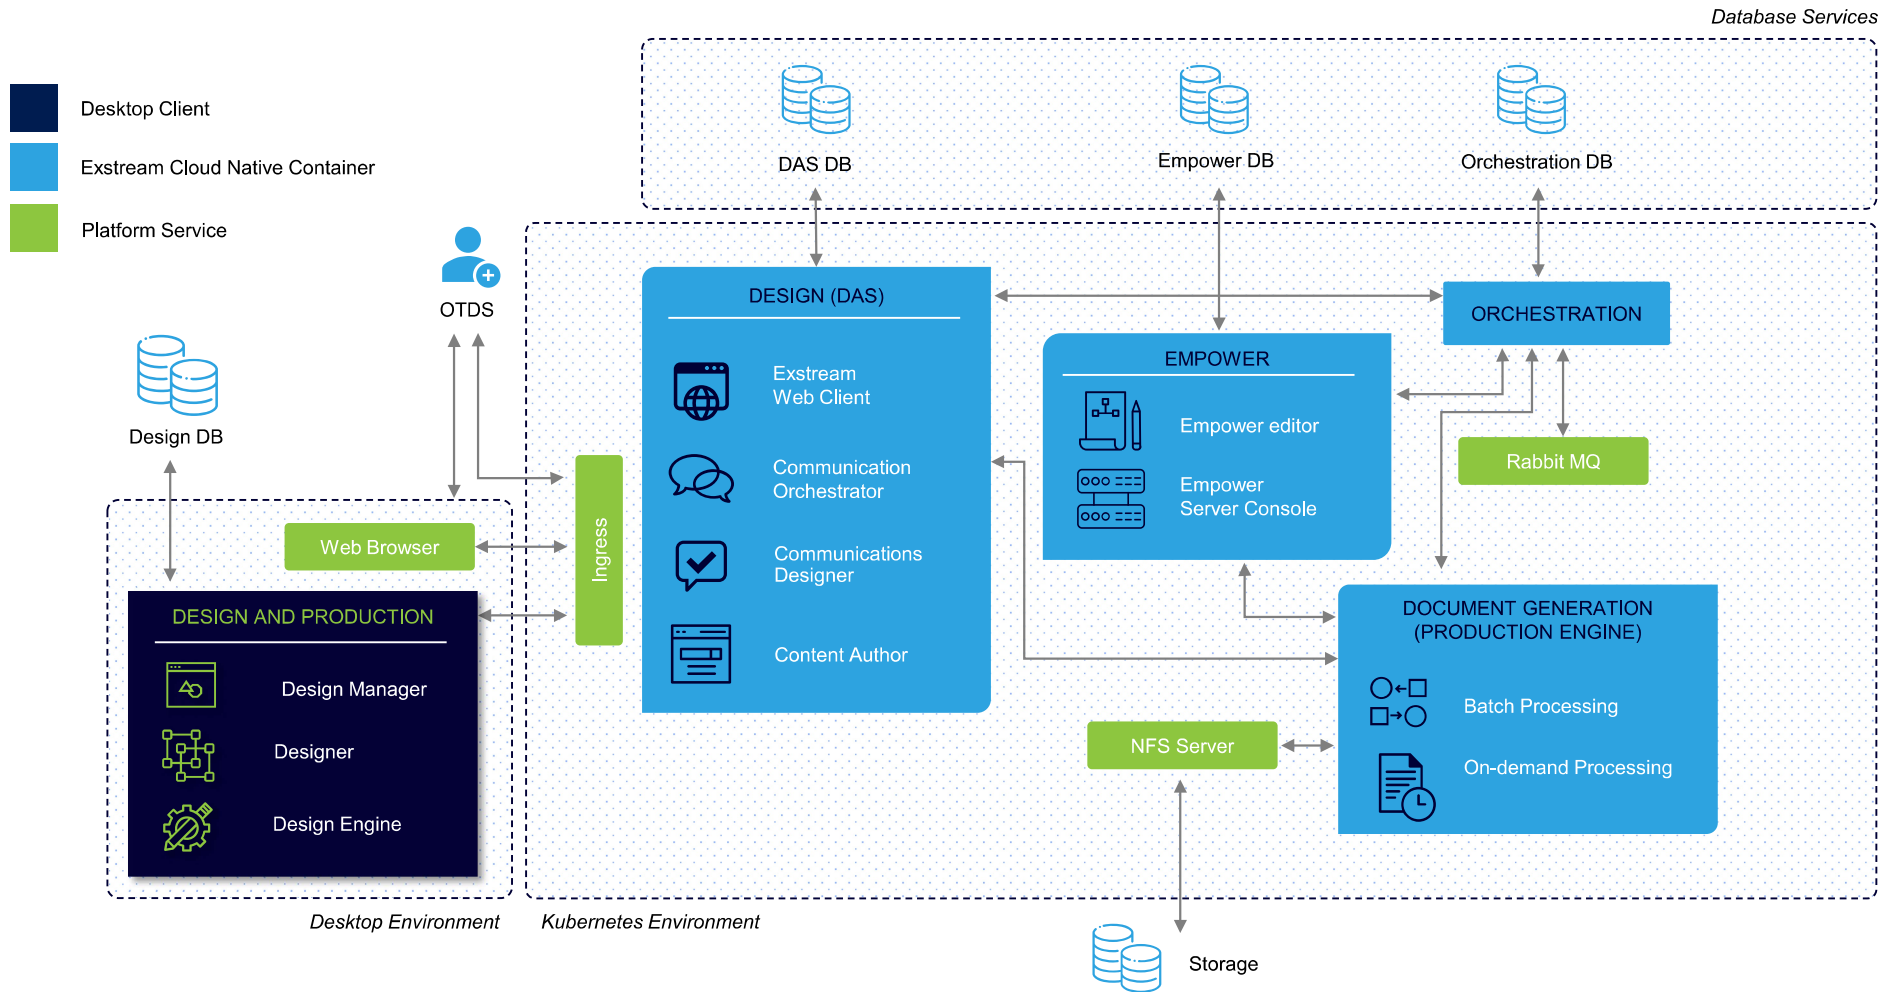

Deploy anywhere

Benefits of Communications Deployment

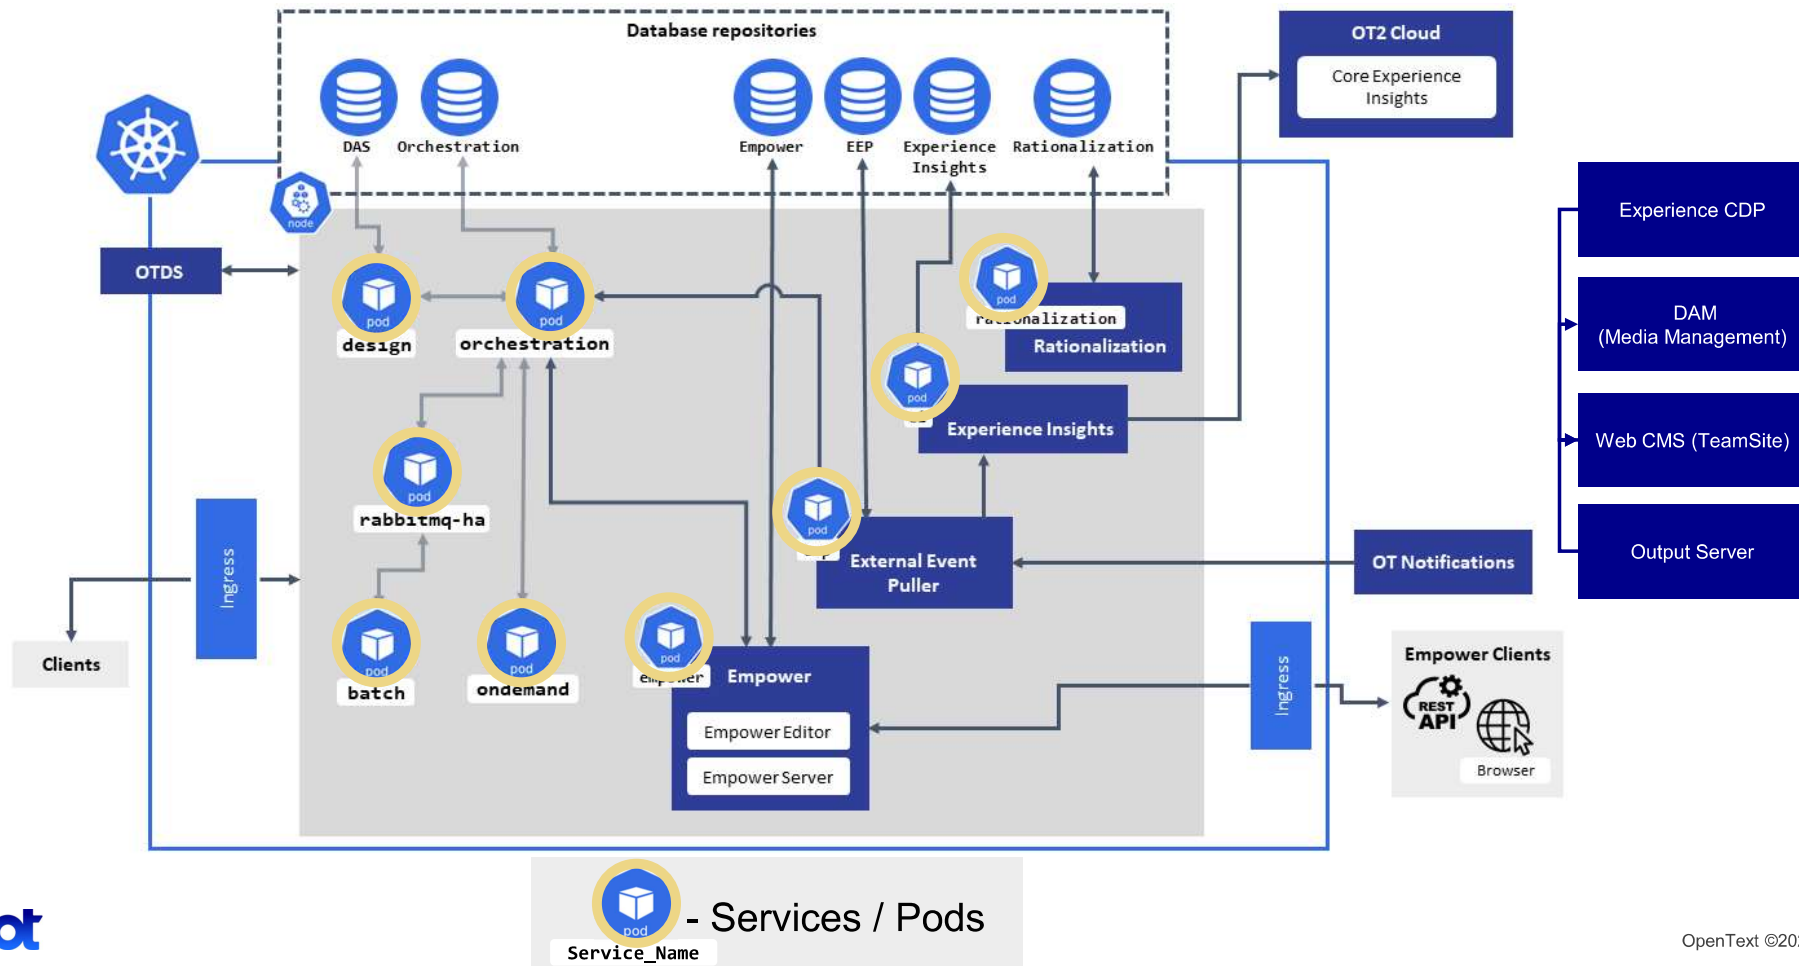

- Uses **cloud native, portable & open-source** industry standards such as **Docker** and **Kubernetes**
- **Rapid deployment** – easily deploy and update automatically
- **Dynamic Scalability** – power when you really need it
- **Run anywhere** – all major cloud platforms support Kubernetes (Azure, AWS, GCP, **Off-Cloud**)

Communications Containerized Architecture

Communications Microservices / API Architecture

Understanding the Communications Transaction License

- Transactional licensing is intended to simplify purchasing for customers and to make it easy to provide a package with a broad set of functionalities for a combined price based on estimated usage. Usage is based on number of transactions where OpenText defines a single “transaction” as a customer record and a single run of the engine. An engine run with multiple outputs will still be counted as a single transaction.
- Only PROD output is tracked/counted, DEV (watermarked output) is not tracked/counted
- **Example:** One customer record part is processed in the Engine to produce one Email, and one PDF file for archiving. This is just one transaction if the output is happening in same run of the Engine.

The background of the slide is an abstract, low-poly geometric pattern in shades of blue and white. The pattern consists of many small, interconnected triangles and polygons that create a sense of depth and movement. The colors transition from a deep blue on the left to a lighter, almost white blue on the right, with a subtle gradient. The overall effect is modern and tech-oriented.

Product Roadmaps

Updated June 2025

xPression Roadmap (CCM)

Last updated: June 2025

Our recent focus for **xPression** has been on providing a customer driven roadmap. xPression **23.4** primary enhancement being that xPression (xDesign, xPresso for Word and xEditor) are now fully compatible with the **64-bit** version of **MS Word**. With customers being content with staying on their current version, our priority has been to provide updated **platform support** and address product defects for versions under current maintenance along with **security updates** to our most recent release, xPression **23.4**. The next release of xPression is planned for April **2026**. It will continue on the same premise as before, based on customer suggested enhancement requests..

xPression 23.4 Delivered

Product Feature Enhancements

- Thanks to the updates to our xDesign and xPresso for Word authoring applications, and to our xEditor interactive authoring tool, xPression 23.4 supports the 64-bit version of Microsoft Word.
- With xPression 23.4, users are now be able to take advantage of the latest version of 64-bit Word for their authoring needs.

Platform Support

- Provides the latest platform support (OS, application server, database and authoring)

Security Updates

- Improves the security related functionality for consistency with current standards

xPression Ongoing delivery

Platform Support

- Provide the latest platform support (OS, application server, database and authoring)

Documentation Improvements

- Provide documentation improvements for clarity and usefulness

Security Updates

- Improve the security related functionality for consistency with current standards

Patch Releases

- Continue to address product defects within regular patch releases

xPression 26.2 Planned delivery

Platform Support

- Provide the latest platform support (OS, application server, database and authoring)

Security Updates

- Improve the security related functionality for consistency with current standards

Enhancement Themes

- Improve xPression based on customer suggested enhancement requests

Communications (Exstream) Roadmap

Last updated June 2025

Communications (Exstream) is a highly performant and flexible, cloud-based Customer Communications solution that gives business users the tools they need to easily respond to rapidly evolving market challenges and deliver personalized, secure, multi-channel customer communications

Communications (Exstream) 25.1

Design, authoring and interactive

- Repeating content support
- DocX as pass through
- Empty page suppression

Modernization

- Exstream Server Based upgrade features
 - Migration of style sheets & styles
 - Color family conversion
 - Table of content objects
- Communication Migration SDK
 - xPpression to Communications (Exstream) convertor

Communications (Exstream) 25.2

Orchestration

- Support for operational optimization with enhanced orchestration job visibility

Experience Aviator AI

- Knowledge driven authoring for communications via Experience Aviator with xECM
- Experience Aviator assisted business rule creation

Design, authoring and interactive

- Delimited and columnar data support, Targeted flow, Document reordering and assembly

Modernization

- Exstream Server Based upgrade features
 - Duplex page designs, Delimited Data File support, Automated Columns, Table row totaling, Multi-column text flow, ZPL output
- Communication Migration SDK
 - StreamServe to Communications convertor

ClaimCenter accelerator available in Guidewire Cloud Marketplace

Future Planned - Communications (Exstream)

Orchestration

- AI assisted orchestration flow creation

Experience Aviator AI

- AI assisted design initialization and creation

Design, authoring and interactive

- Campaign support for authoring, prioritized design feature backlog

Modernization

- Exstream Server Based upgrade features
 - Table row flow breaks, adjustable table cell widths, banner pages

Cloud optimized deployment and operations

- Public Cloud (SaaS) Communication Service CCM solution with simplified design and orchestration
 - Support for CXaaS integration with Core Messaging, Core Journey, Core DAM, Exp Aviator
- PolicyCenter & BillingCenter accelerators available in Guidewire Cloud Marketplace**

Communications for Salesforce Roadmap

Last updated: June 30, 2025

Our vision is to be the go-to solution for Salesforce users – be it via Salesforce Sales Cloud, Services Cloud or Experience Cloud - to transform customer data into meaningful correspondence, providing seamless integration into Salesforce, maximum flexibility and security. Based on the OpenText Communications platform, the solution can be rapidly deployed, requiring minimum customer implementation effort. The out-of-the-box integration into OpenText Content Management will provide a unified user experience of the OpenText solutions.

Delivered Recently

Innovation

- Improve capabilities for Salesforce flow integration, thus extending support for more complex scenarios

Usability

- Provide approval workflow capabilities for OpenText Interactive based documents to ensure integrity of communications
- Allow the storage of document drafts for later editing, so that users are enabled to edit document in multiple sessions
- Support the integration of Interactive communications into Salesforce flows, to allow for interactive communications as part of Salesforce processes

Q4 CY2025 [25.4] in progress

Integration

- Ensure seamless compatibility with the upcoming Salesforce Winter '25 release, as well as with the latest releases of Communications Server Based and Communications Cloud Native. This will empower customers to leverage the latest features and enhancements offered by both solutions, enabling them to stay at the forefront of innovation and maximize their productivity.

Future

Integration

- Offer a comprehensive SaaS experience for multiple tenants by leveraging OpenText Core Communications.

Usability

- Enhance user experience by simplifying access to draft documents, thereby reducing the complexity of editing documents across multiple sessions.

Administrator Usability

- Streamline administration and configuration processes with the implementation of a central administrative UI. Simplify management and effortlessly configure the solution for enhanced efficiency

Core Journey & Customer Data Roadmap

Last updated: June 2025

Core Journey collects valuable data from customer interactions across channels, devices, and applications to visualize all customer touchpoints and to provide analysis and insights on customer behavior along the customer journey. It integrates with all enterprise systems and triggers logic-based actions along the customer journey in real-time. Customer Data unifies data to provide a common view of customer profile and audience data across these various touchpoints and journeys. Together, Core Journey and Customer Data allow businesses to provide relevant and contextual customer experiences and communications. By leveraging easy personalization at scale, they turn behaviors and insights into measurable and actionable business outcomes of your marketing efforts.

Delivered Recently

Journey

- Optimize actions and orchestrations d scalability
- Actionable information to optimize customer's success by using analysis

Developer

- Analysis Query API

Data

- Preference management
- Customer segmentation for driving personalized omni-channel conversations

Q3 CY2025 [25.3] in progress

Journey

- Configurable favorites for direct access of journeys, analysis, and dashboards
- Analysis extended to analyze behavior at datapoints in journeys
- Journey Insights through journey KPI, success funnel, and data point analysis charts

Q4 CY2025 [25.4] planned

Journey

- Core Engagement integration for actioning immediate, direct communications
- Journeys triggered by engagement and campaigns

Data

- 360° view of the customer dashboard

Future targeted Q1 CY2026

Journey

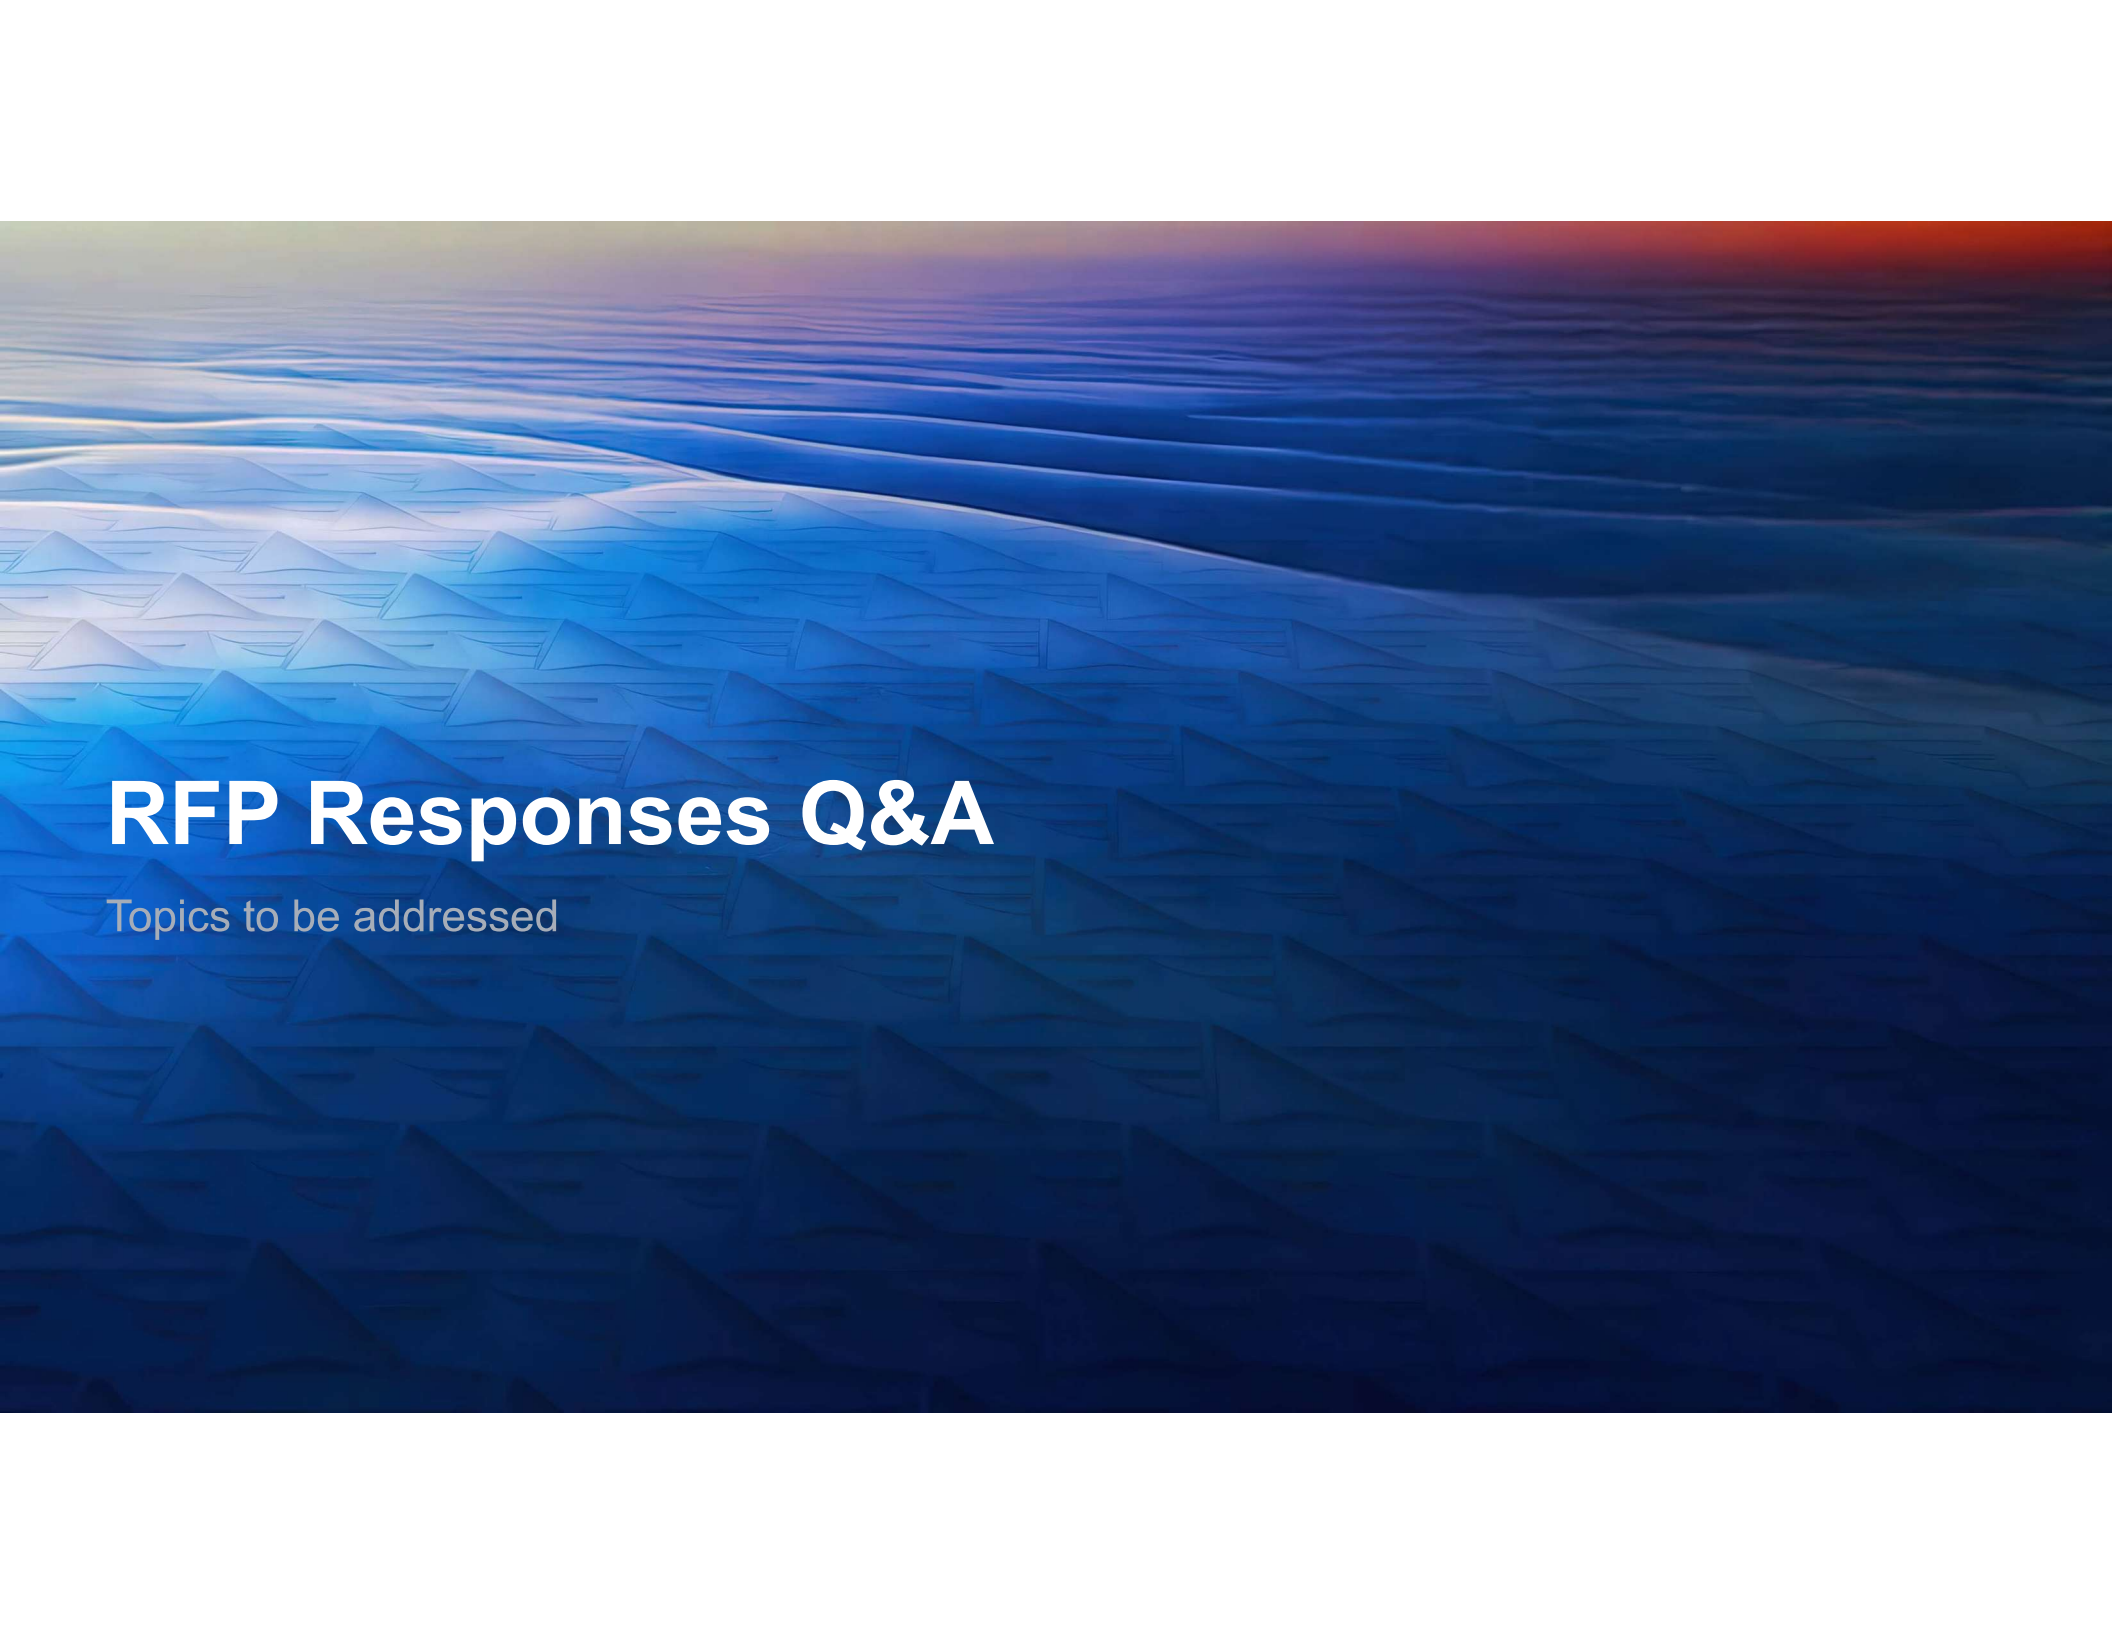

- Adopting consistent OpenText JATO UI
- Recurring Journeys and subjourneys for reuse
- AI-Agent for journey design and creation
- AI-powered insights and recommendations

Developer

- Journey management API

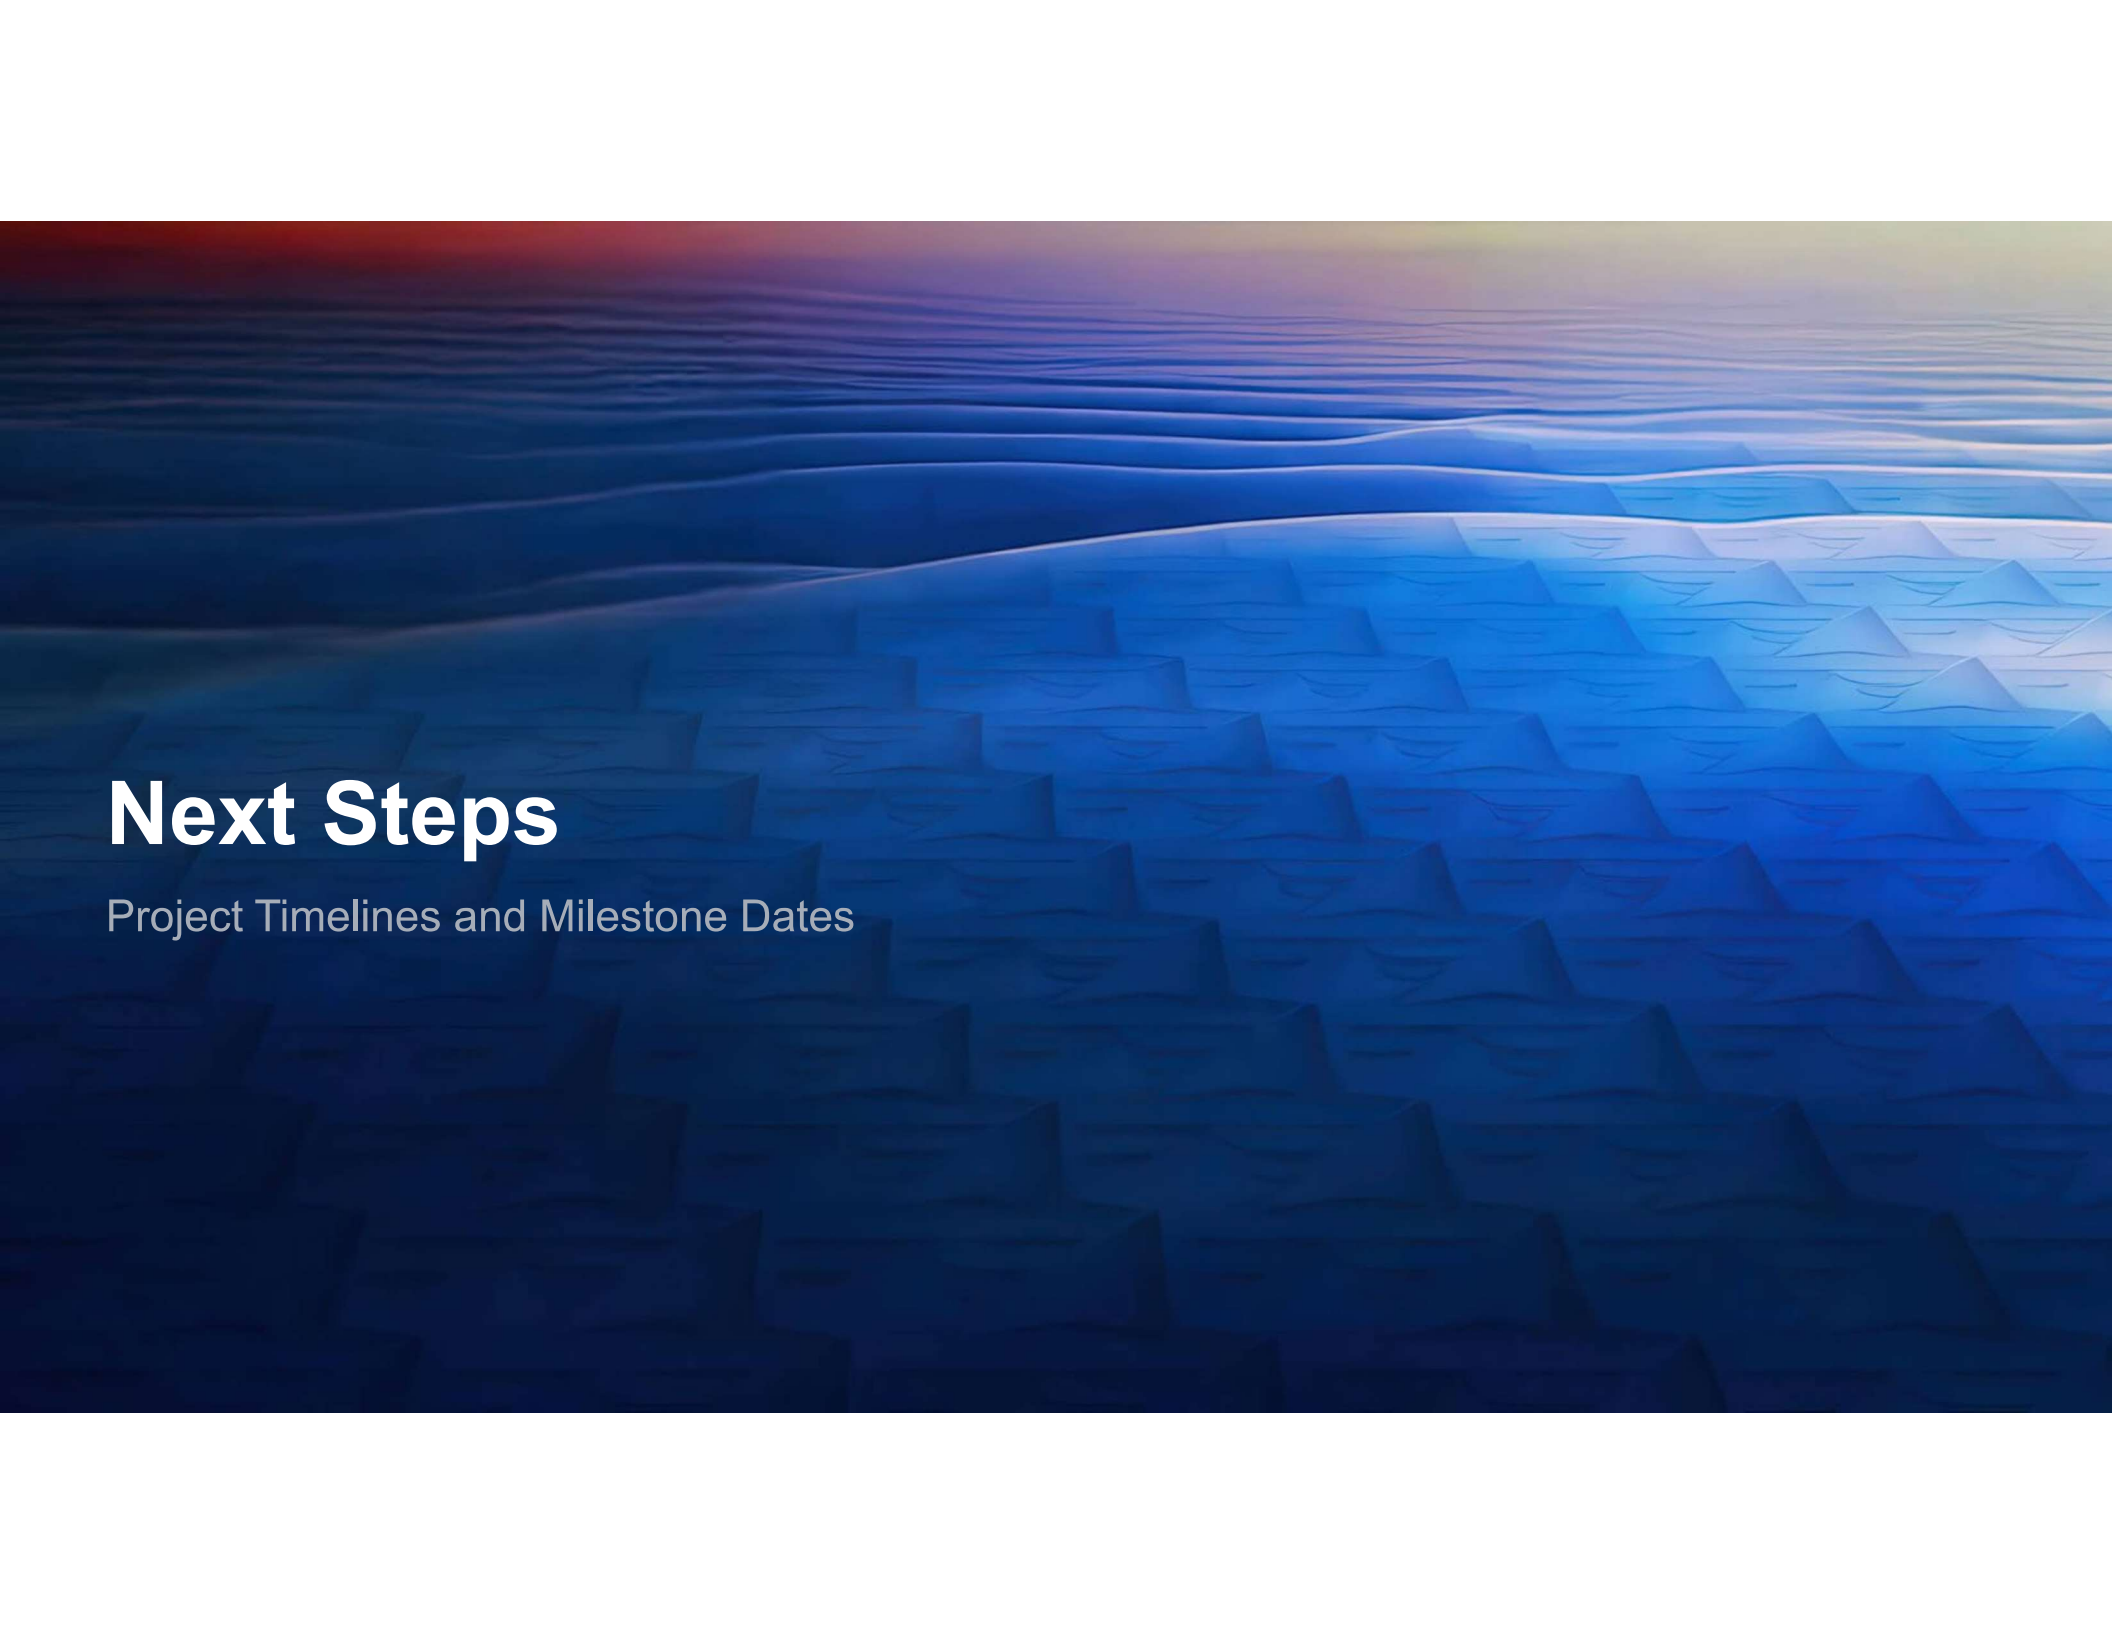

Data

- API Gateway for "zero copy"

RFP Responses Q&A

Topics to be addressed

The background features a gradient of blue and purple hues. In the upper portion, there are soft, wavy horizontal lines. Below these, a grid of small, three-dimensional cubes or blocks is visible, creating a textured, isometric effect. The overall lighting is soft, with a slight glow on the right side.
